Open Door Workshop

Selected Works

Papercrete Lights

The papercrete lights are a series of fluid form lights made with a combination of cement and waste paper pulp.

The pieces are unique, each of them is handmade using a specific base form.
Series 1 and 2 is a series of truncated cones, series 3 is made of bamboo forms.

Papercrete Lights - Series 4

This series of forms are under process, they are a group of soft deformed cones.

We would like to propose that we release these for the exhibit.

Siyaal

A series of fluid form terrazzo platters inspired by the sea of Karachi.
